At Salsa, we believe that a sense of adventure makes life better. The bicycle can be so much more than just a bike; it’s a path to new places, new people, and amazing experiences. Thank you for your purchase. We hope it makes a good riding experience even better!

Salsa. Adventure by bike.®

⚠️ WARNING: Cycling can be dangerous. Bicycle products should be installed and serviced by a professional mechanic. Never modify your bicycle or accessories. Read and follow all product instructions and warnings including information on the manufacturer’s website. Inspect your bicycle before every ride. Always wear a helmet.

Compatibility & Intended Use

These instructions cover service and replacement of hardware and bearings located at the pivot where the control link connects to the front triangle. These instructions are valid for all Salsa suspension frames with Split Pivot technology.

Required Hardware

Hardware kits required to service this area include:

• 1590 Control Link Pivot Hardware Kit which is compatible with all models and spec level of MY19 and newer Salsa suspension frames

Replacement bearings must be ordered separately. See table below for bearing specification and quantity for each frame model.

Tools & Supplies Required

Torque Wrench
6mm hex bit
15mm, six-point, thin-wall socket
Bearing removal and installation tools (if replacing bearings)
Loctite Blue 242®
Lightweight grease
