

## Anything Cage Assembly Instructions

### WARNING

Installing this Salsa product on a bicycle requires in-depth knowledge of bicycle mechanics and professional-grade tools. If you do not have the proper tools or knowledge to perform this installation, please take your bicycle to your local bicycle dealer. Failure to appropriately install this product may lead to component failure, resulting in serious injury or death. We recommend that you have this product installed, adjusted and maintained by a professional bicycle mechanic.

**Tools:** 4mm hex wrench, torque wrench

### Anything Cage Installation

The Anything Cage mounts to standard water bottle cage bosses with M5 bolts. However, it's designed with three bolt holes for use with Fargo, Mukluk and Enabler forks featuring our three-bolt bosses.

**WARNING:** The Anything Cage will mount to your bicycle in several different ways. Where you position the cage will depend on personal preference, frame size and geometry, as well as the gear you choose to use. Make sure that neither the Anything Cage nor your gear interferes with the function of your bicycle BEFORE attempting to ride.

#### Three-Bolt Configuration (for Salsa Forks)

1. Mount the cage to the fork using three M5 bolts (fig. 1). Torque 3–5 Nm
2. Route the straps through the top and bottom slots (fig. 2–3)
3. Place your gear in the cage and strap it down (fig. 4) Check that your cargo and all loose straps are secure before riding and periodically during use.

#### Standard Water Bottle Cage Mounts

1. Mount the cage to the fork using either the two top or bottom holes (fig. 5). Torque bolts 3–5 Nm
2. Route the straps through the top and bottom slots (see fig. 2–3)
3. Place your gear in the cage and strap it down (fig. 6). Check that your cargo and all loose straps are secure before riding and periodically during use.

### **Hose Clamp Mounting**

We designed the Anything Cage with slots to accommodate hose clamps for mounting to frames or forks without the necessary braze-ons. Hose clamps should be used only as a last resort.

**WARNING:** Hose clamps are designed to generate a large amount of clamping force: use at your own risk. Salsa is not responsible for bodily injury or damage to your frame or fork as a result of installing hose clamps.

- Do not use hose clamps on carbon fiber frames or forks
- Do not use hose clamps on thin-walled aluminum frames or forks
- Use of hose clamps may void the frame or fork warranty. Check with the manufacturer

### **To install:**

1. Wrap the clamping area with a rubber shim to avoid scratching your frame
2. Route the clamp through the slots in the Anything Cage and around the frame/fork tube
3. Snug the clamp with a screwdriver

### **WARNING**

- Do not modify the Anything Cage. Doing so will void the warranty (see below)
- Make sure your load is secure before riding (i.e. no loose straps to get caught in the wheels)
- Weight limit: 4 lb

### **Warranty**

Salsa Cycles warrants this new Salsa product against defects in materials and workmanship for five (5) years from the original date of retail purchase by the consumer. This limited warranty is expressly limited to the repair or replacement of the original product, at the option of Salsa Cycles, and is the sole remedy of the warranty. This limited warranty applies only to the original purchaser of the Salsa product and is not transferable. In no event shall Salsa Cycles be liable for any loss, inconvenience or damage, whether direct, incidental or consequential or otherwise resulting from breach of any express or implied warranty or condition, of merchantability, fitness for a particular purpose, or otherwise with respect to this product except as set forth herein.

This warranty does not cover the following:

- Damage due to improper assembly or follow-up maintenance or lack of skill, competence or experience of the end user
- Products that have been modified, neglected, used in competition or for commercial purposes, misused or abused, involved in accidents or anything other than normal use
- Damage or deterioration to the surface finish, aesthetics or appearance of the product
- Normal wear and tear
- Labor required to remove and/or refit and re-adjust the product within the bicycle assembly

This warranty gives the consumer specific legal rights, and those rights and other rights may vary from state to state.
