2. Torque bolts 3–5 Nm

**▲ WARNING:** For full-suspension bikes, verify that neither the bottle nor the Nickless Cage interferes with the function of your bicycle by compressing the shock with the bottle and cage in place.

### Ongoing Maintenance

Be sure to cycle suspension once cage is installed to verify there is no interference between cage, bottle, or frame.

Periodically check that mounting hardware is secure and cage is held in place tightly.

Inspect cage for any damage that may cause bottle to dislodge while riding.
